

January 21, 2026: On My Thanks to Our Political Leaders

Thank you, Republicans and Democrats. I truly appreciate you all affecting our life in such a way. I appreciate you all calling for our support while you did so, and I am truly thankful for getting involved in our local politics.

Donald Trump: thank you so much for begging for us to join the Republican Party as a Precinct Chair. Thank you for all of the opportunity that we received as you unleashed you parasitic disease upon our perfect world.

I am confident that you are all the plague that we should be avoiding in our lives and in our world. You are all a cancer that is destroying an otherwise wonderful world.

My wife and I had an absolutely perfect life before your influences reached our home. We should never have had to endure the Covid-19 biological weapon. We should never have had to fight for our freedoms to live during that time and we certainly should not still be dealing with the fallout from the time that I spent uncovering the fake election results of Texas.

Truly, politicians of Texas and the United States of America, no matter how good you all believe that you look in your own eyes, you look like rotten festering diseased wounds to me and my wife. You are a cancer. You are a disease. You are exactly what the society needs to remedy in order to regain our paths to life.

If you all cannot let go of your positions in government, I am certain that our path is nothing positive and will absolutely end in disaster. You have plagued our country, our state, our city, our neighborhood and our very home.

Thank you. It was a pleasure learning what exactly is happening in our world. All I ever wanted to learn was the truth and now I can see it all very clearly.

You are cancer. You are disease. You are a plague that is eating away the life of your own communities. It's you. You are the problem. No 'criminal', no 'bum', no 'burnout' no 'pothead' and no 'junkie' has ever caused the problems in my life that you all have.

You are what is wrong with this country, state, and world.

I will take an honest crackhead as my friend before any politician every single day of the week.

Chris Carlin
